## How to call internationally:

To call an international landline number you will need to have the following information:

International Dial Code (Exit Code-from the country you're calling from)

Country Code (country you're calling to)

Area Code

Phone Number

In order to dial the UK landline number 02012345678 from the US you will need to follow these steps:

1. remove the zero "0" from in front of the area code: 20112345678
2. Dial the International Dial Code for the US (011) *then* Country Code for UK (44) *then* Area Code (20) *then* Phone number (12345678)
  - o The number you dial should look like this: 011 44 2012345678

Dialing or texting an international cell number is even easier. Let's say you want to call 07123456789, which is a UK cell number, from a cell in the US. You would follow these steps:

1. remove the zero "0" from in front of the area code: 7123456789
2. Dial "+" then the Country Code for UK (44) then Phone number (7123456789)
  - o The number you dial should look like this: +44 7123456789

To dial the same UK cell number number from a landline, replace the plus sign "+" with the Exit Code.

011447123456789

You cannot dial "+" on a landline phone, so you have to use the Exit Code.

If you follow these steps you shouldn't have any issues reaching your friends and family who live abroad. Also, if you travel frequently we've found the [best U.S phone plan and iPhone](https://www.callersmart.com/articles/14/Best-Phone-Plan-iPhone-For-American-Digital-Nomads) (<https://www.callersmart.com/articles/14/Best-Phone-Plan-iPhone-For-American-Digital-Nomads>) combo for the digital nomad, it makes international calling affordable!
